Production Enhancement

Unlock every drop of energy from your shale reservoir with production enhancement chemistries that are tailored to your produced water and well conditions.

Production Enhancement Commodity & Specialty Chemical Portfolio

- Anti-sludging agents
- Barium sulfate dissolvers
- Biocides
- Breakers
- Buffers (low & high)
- Clay stabilizers
- Corrosion inhibitors
- Complete fluid systems
- Crosslinkers
- Crosslink delay agents
- Enhanced Oil Recovery technology
- De-foaming agents
- Fines suspension agents
- Flowback agents
- Foaming agents
- Friction reducers
- Gel breakers
- Gel stabilizers
- Gelling agents
- Guar gum powders
- Guar gum slurries
- High viscous friction reducers
- Iron control agents
- Paraffin control
- Polymer slurries
- Micro-emulsions
- Modified acid systems
- Mutual solvents
- Non-emulsifiers
- Scale inhibitors
- Surfactants

Manufacturing

Tendeka’s formulations are designed and blended in-house by Tendeka’s Production Enhancement team, which includes over 30 years of expertise in product development, field application, research and development, and manufacturing. Manufacturing facilities are strategically located in Alleyton and Pecos, Texas.

Distribution & Warehousing

Tendeka has access to distribution networks of chemicals and technology that expands far outside of the oil and gas industry. Tendeka provides its customers with cost-effective transloading and storage of hazardous and non-hazardous chemicals. Tendeka will help manage the inventory of its customers.

Logistics

Tendeka offers its customers 24-hour customer care and in-house logistics. It also maintains third party logistics on standby 24-hours a day to ensure there is no disruption to chemical delivery to the wellsite.

Field Fluid Consultants

Tendeka’s experienced fluid consultants will soon be able to not only optimize fluid systems on location in their mobile lab but do so with friction flow loop testing. Our experienced fluid consultants will also provide chemical inventory management.

Optimized Solutions

Tendeka provides optimized solutions by combining its production enhancement chemistries with its completion hardware.
